

Smart homes, better living

So much power
in such a small box

Tydom
Home

Tydom Pro
the invisible version
of Tydom Home

OPEN

Tydom Home and Tydom Pro are a genuine evolution of Tydom I.O on account of their openness, which guarantees a smart home that is even more scalable.

A Delta Dore offer extended to cover smart sockets and bulbs* already on the market using Zigbee 3.0 technology.

** depending on models and brands*

ZIGBEE
compatibility

More than **400**
COMPATIBLE
products

Our hubs are compatible with Delta Dore devices and with devices from the leading manufacturers of smart home products (garage doors, heaters, gates...)

Our hubs are compatible with the new telecom operator protocols.

** available: Autumn 2022*

Consideration of
IPv6*

Tydom Home

For simple and fast installation, thanks to its size and design, Tydom Home can be easily integrated into your customer's properties.

The functionalities of Tydom Home and Tydom Pro are the same, only the format changes - thus offering more choice for your customers, and greater installation flexibility for you.

Tydom Pro

A patented Delta Dore innovation !

For optimised installation within a consumer unit, occupying the space of only 2 modules.

Tydom Pro is the smallest hub on the market!

Thanks to its external antenna, it can even be installed in metal consumer units, without any configuration to be carried out !

A single app Tydom

Available on the App Store and Google Play,
Tydom is the only app that allows you to control everything in your
home. It is free of charge, secure, and comes without a subscription.

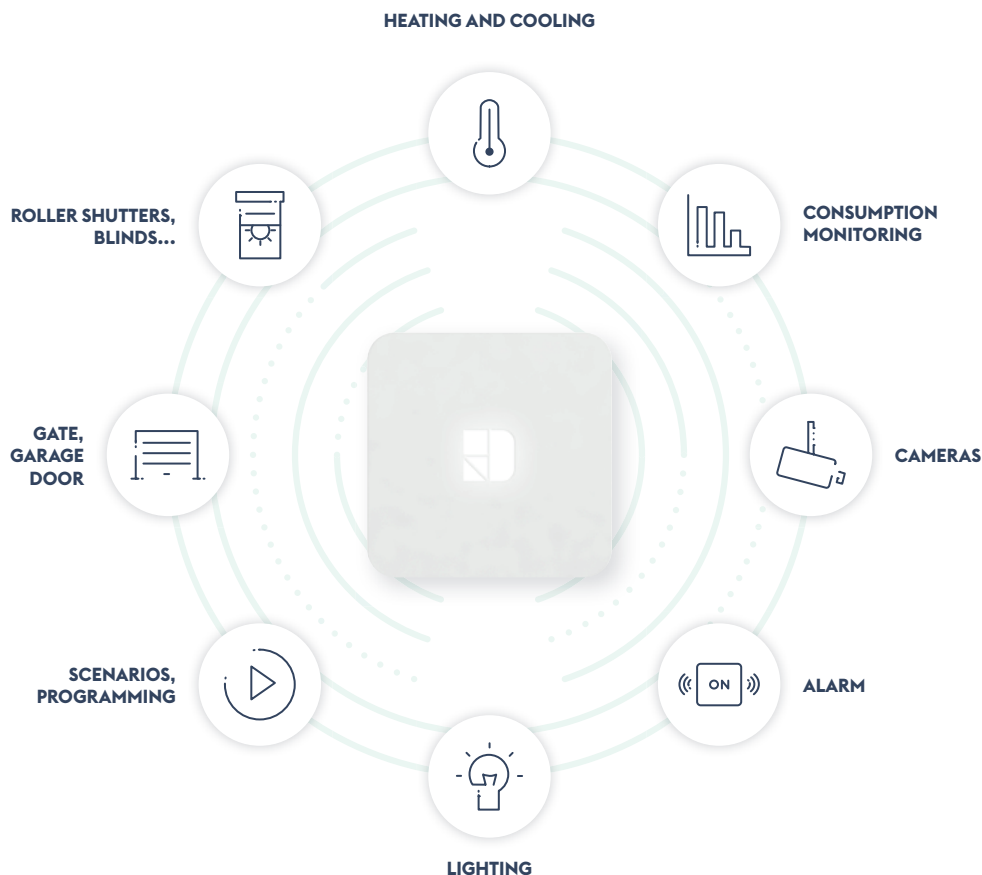

**The Tydom app also has a pro account
allowing you to intervene in your customers' properties.**

Easily share details of ongoing
installations with our technical
support, or with another installer, if
necessary.

Ensure simple monitoring thanks
to improved visibility of all of your
active sites, displaying useful
information.

Tydom Home & Pro: the largest ecosystem on the market

With our Tydom Home and Pro hubs, the smart home adapts to meet the desires and needs of your customers, thanks to radio technology.

**Consider offering your customers additional functions
on top of meeting their initial requirements!**

Tydom Home smart home hub

Tydom Home Ref. 6700119

— Features
