

Smart TRV

precise control powered by AI

An intelligent TRV, thanks to built-in AI

Start-up anticipation

Thermostatic heads optimize hot water flow to deliver precise, immediate comfort exactly when needed.

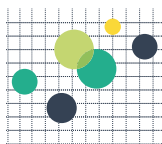

Regulation adapted to the type of radiator

Thanks to AI, the Smart TRV instantly adjusts its control settings for optimal performance, whatever the radiator type.

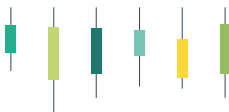

Adaptation to seasonal variations

The Smart TRV continuously learns and automatically adapts to seasonal changes for consistently optimal comfort.

Hydronic system balancing

The Smart TRV automatically adapts to the installation and corrects flow rates for optimal comfort, with no manual adjustments needed.

Optimized battery life

AI optimizes valve control to save battery power and guarantee 2 years of peace of mind.

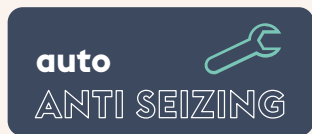

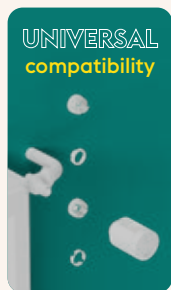

Adjustment based on the home's insulation quality

The thermostatic head adapts to your home's insulation to provide ideal comfort without wasting energy.

Designed for professionals:

quick to install, simple and flexible

A flexible solution suitable for all projects

A flexible installation process: pair the Smart TRV with the connected home hub before or after installing it on the radiator. Ideal for adapting to site constraints, even without power on site. **Fully compatible with all types of homes, creating more installation opportunities.**

Smart TRV head	6O5O685	M3O x I.5 smart thermostatic radiator valve for all types of hot-water radiators connected to a gas, oil, or wood-burning boiler, or to a heat pump
Smart TRV head adapt	6O5O686	M3O x I.5 smart radiator thermostat pack with various adapters: Danfoss (RA, RAV, RAVL), Caleffi, Giacomini and M28 x I.5
Adaptor pack	62OO282	Set of 6 adapters for M3O x I.5 smart radiator thermostat: I Danfoss RA adapter, I Danfoss RAVL adapter, I Danfoss RAV adapter, I M28xI.5 adapter, I Caleffi adapter, I Giacomini adapter
RF643O interlock	6O5O676	Wireless receiver for boiler or heat pump for Smart TRV: on/off control for multi-zone installation
STI 2OOO	63OOO5I	Indoor temperature sensor for deported control (with TRV & tydom app/hub)
Easy plug	6353OO9	Smart G (UK) socket, I3 A, with consumption measurement and history - Control of a light or electrical appliance with On/Off switching, consumption monitoring and history from a smartphone or using your voice - Zigbee repeater
Smart TRV head starter pack	6O53O96	Pack of 3 smart thermostatic heads M3O x I.5, with adaptors, Tydom home & an RF643O, for all types of water-based radiators connected to a gas, oil, or wood boiler, or to a heat pump.

Smart TRVs

The simple energy saving solution.

It is well documented that Smart TRVs can deliver savings of over 28% when used with a gas boiler.

Recent research by BEAMA shows that Smart TRVs can reduce ASHP space heating energy consumption by 6-8% without reducing efficiency.

Connected Living, Elevated

When connected to the Delta Dore smart home hub, TRV2 unlocks advanced features that make home management effortless.

One App, Total Control

All your clients' heating and cooling systems are centralised in the Tydom app. No more switching between devices or juggling multiple apps — just smooth, intuitive control.

Automatic synchronization

Within the same room, valves automatically synchronize the temperature across different radiators and adjust their settings.

Adapts to everyone's lifestyle

Low battery? Users are informed in real time. Manual, auto or holiday modes let everyone adapt the system to their own routine.

Your Clients Will Love: A single app to manage everything

Remote control from anywhere

Easy scheduling via the app

Voice control compatibility
