

ALARM

next generation
Tyxal+

The heart of the system

A new connected siren control unit for enhanced security.

The Hub connects directly to the Tydom app, can send alerts via the mobile network thanks to a SIM card, and is compatible with all Tyxal+ radio devices to create a custom security solution.

Hub Tyxal+ - Réf. 6411126

Functions

- Monitoring of the home in up to 8 zones using detectors (motion, opening, video, smoke, etc.) and cameras
- Integrated deterrent siren in the event of intrusion or technical detection
- Alerts via notifications and/or voice and SMS calls in the event of intrusion, pre-alarm, fire risk, etc.
- Alarm control via remote control, keypad, badge and Tydom app
- Total system start-up/shutdown indication (notification and/or SMS depending on equipment)
- **Compliant with EN50131-2 standard:** System protected against sabotage attempts (radio jamming, tamper alarm on opening/removal, code entry and remote access security)
- Compatible with a SIA DCO9 IP protocol remote monitoring system
- Chime mode to warn when someone is approaching

The PACKS

Pack Initial Tyxal+
Ref. 6410201

Pack Optimal Tyxal+
Ref. 6410202

Technical characteristics

| | |
|--|----------------------|
| Dimensions | H:168 W:168 D:37 mm |
| IP Index | 30 |
| Mounting method | Surface mounted |
| Selfprotection | Opening, Pull out |
| Decibel level of the integrated siren (dB) | 105 dBA max |
| Power supply type | Main supply, Battery |

| | |
|-----------------------------------|--|
| Type of tone in intergrated siren | Intrusion, Fire, Technical, Doorbell, Distress |
| Backup power life | 7 days on new batteries |
| Cable length | 1.80 |
| Max number of peripheral products | 50 |
| Communication protocol | GSM 4G, X3D, Wifi 802.11 b/g/n |

The Tyxal+ Hub meets the requirements and highest European standards for anti-intrusion security.

Anti-jamming

The Tyxal+ Hub constantly checks the radio signal and reports any attempted interference to keep the system protected, even in difficult conditions.

Secure radio protocol

The Tyxal+ Hub uses the X3D secure radio protocol, with dynamically encrypted frames and a unique factory code, guaranteeing reliable, fraud-proof transmission.

Anti-tamper

The Tyxal+ Hub is continuously protected against opening, removal or sabotage. In the event of an attack, it immediately triggers an alert, even when the system is switched off.

Continuous detection and monitoring

The system distinguishes between human and animal movements and continuously checks that each piece of equipment is working, immediately signalling if it is no longer receiving communication.

Increase security with

remove the doubt

VIDEO

Presence detection

Your Living Room detector has just detected movement in your home.

Indoor smart security camera

Tycam Home is an easy-to-install intelligent surveillance camera with intercom, so you can maintain control of your home at all times.

Outdoor smart security camera

Tycam Guard, the intelligent camera that detects accurately and integrates intercom. Reliable, robust and secure: try it and you'll love it!

Video motion detector (PIRCAM)

The quick to install Tyxal+ DMBV provides video detection of an intrusion, with image transmission for reliable analysis.
