Reliability, performance and style

Tyxal+: the professional range

designed with **you and your customers** in mind

Wireless alarm

ensures speedy wireless assembly and installation of the highest professional standards, with no damage to interior decoration.

Exclusive to Delta Dore

A safe and long lasting product, requiring minimal effort for maintenance. Your customers will love the financial and environmental benefits of a longer battery life when they find out that the system's battery can last up to 10 years!

Easy to configure products

ensure simpler configuration and quicker and more intuitive familiarisation for the whole family: indoor and outdoor keypads, keyring remote controls, smartphone or tablet control using the Tydom home automation app

Proven to be reliable

With over 10 million X3D points installed in France and worldwide, the integrated anti-jamming feature protects the radio connection and 2 radio frequencies (868.30 and 868.95 MHz).

Status report

Your customers will be able to see visual confirmation that their commands have been received.

Customised installation

Indoor and outdoor detection, video, cameras, telephone transmission, remote control...and much more!

A secure security system

The integrated anti-jam system will alert your customers if there are any hacking attempts.

The tamper alarm system will alert your customers if the products have been opened or improperly dislodged.

The alarm control unit ensures crystal clear connection between all system components and will warn your customers of any defects.

Effortless style

The ultra-modern shapes and colours of your products blend seamlessly into any home environment.

European
Conformity
EN 50131

The key principles of security

Detect intrusions, monitor, alert, centralise, interact **in the home**

Intruder detection

Motion detectors

Door/window magnetic contacts

Protection from domestic hazards

Smoke detector

Mains power failure detector
Detects power outages that exceed 30 minutes.

Leak detector
To be installed in sensitive areas.

Monitor and receive alerts
Remote activation of alerts by telephone with control of the alarm, heating, lights and roller shutters.

Reporting intruders and scaring them off

Outdoor siren

A powerful tone for a good deterrent effect.

Centraliser

Siren control unit

It is the essential element of the alarm system for a permanent interface with the elements installed.

Control

Badge reader

Indoor keypad

Touch screen keypad

Outdoor keypad

Key ring remote control

Tydom 2.0

Indoor connected camera

Dual lens video motion detector
Visual confirmation for intrusion, both during the day and night.

Always under control even remotely!

With the TYDOM application, your customers can control their alarm system from a smartphone or tablet.

The key principles of security

Detect intrusions, monitor, alert, centralise, interact

in business premises

Intruder detection

Motion detectors

Door/window magnetic contacts

Monitor and receive alerts

Remote activation of alerts by telephone with control of the alarm, heating, lights and roller shutters.

Outdoor connected camera

Tydom 2.0

Dual lens video motion detector

Visual confirmation for intrusion, both during the day and night

Key ring remote control

Always under control even remotely!

With the TYDOM application, your customers can control their alarm system from a smartphone or tablet.

The principle of wireless security

Tyxal+ Access Pack
Ref. 6410186

- Can manage up to 16 peripheral devices (excluding Tydom 2.O and DMBV motion detector)
- Wireless preconfigured pack

1 siren alarm control unit
Manages 1 or 2 separate zones

1 touch screen indoor keypad
System control and configuration with alarm status information

1 motion detector
Infrared detection of any motion in a room (pet immunity compatibility)

2 keyring remote controls
Ability to turn the alarm on/off in 2 zones, or control various control systems (gate, garage door, outside lighting, etc.)

1 magnetic detector
Detects when a door or window has been opened

.....

Connect to Tydom I.O for push notifications wherever you are

8-zone security with home automation control

Tyxal+ Pack
Ref. 6410168

- Can manage up to 50 peripheral devices
- Wireless preconfigured pack

1 siren alarm control unit
Manages 8 separate zones

1 touch screen indoor keypad
System control and configuration with alarm status information

2 motion detectors
Infrared detection of any motion in a room (pet immunity compatibility)

2 keyring remote controls
Ability to turn the alarm on/off in 2 zones, or control various control systems (gate, garage door, outside lighting, etc.)

An extra touch: visual security

Video Tydom Pack Ref. 6410174

- Pack for receiving alerts and providing visual confirmation both day and night
- Can manage up to 50 peripheral devices (including 4 dual lens video motion detectors)
- Wireless preconfigured pack
- To be connected to a Tyxal+ alarm control unit
- Not compatible with Tyxal+ Access pack

1 GSM telephone transmitter for connected homes with free application and no fees

Makes a voice call or sends an SMS if there is an alert (intruder or technical issue)
Smartphone notifications if intrusion is detected

Compatible with all Delta Dore connected products so each installation can be easily upgraded:

1 dual lens video motion detector

Infrared detection of any motion in a room
(pet immunity compatibility)

When associated with the alarm control unit and the transmitter, visual confirmation in the event of an alert can be provided and the property can be monitored remotely at any time.

Ideal for monitoring the home or small business

Tycam Connected Cameras Available October 2018

- Quick and simple installation (compatible with all routers)
- Secure video feed: prevents image hacking
- Multi-site application: 8 cameras per site
- Compatible with or without Tydom smart home hub

Tycam 1100 Indoor connected camera • Ref. 6417006

Plug and Play installation
Day and night vision
Power over Ethernet
Resolution FULL HD (up to 1080p) Ensures an optimal image quality
Local recording
Smart functions

Tycam 2100 Outdoor connected camera • Ref. 6417007

Plug and Play installation
Day and night vision
Power over Ethernet
Resolution FULL HD (up to 1080p) Ensures an optimal image quality
Local recording
Smart functions

Tydom application :

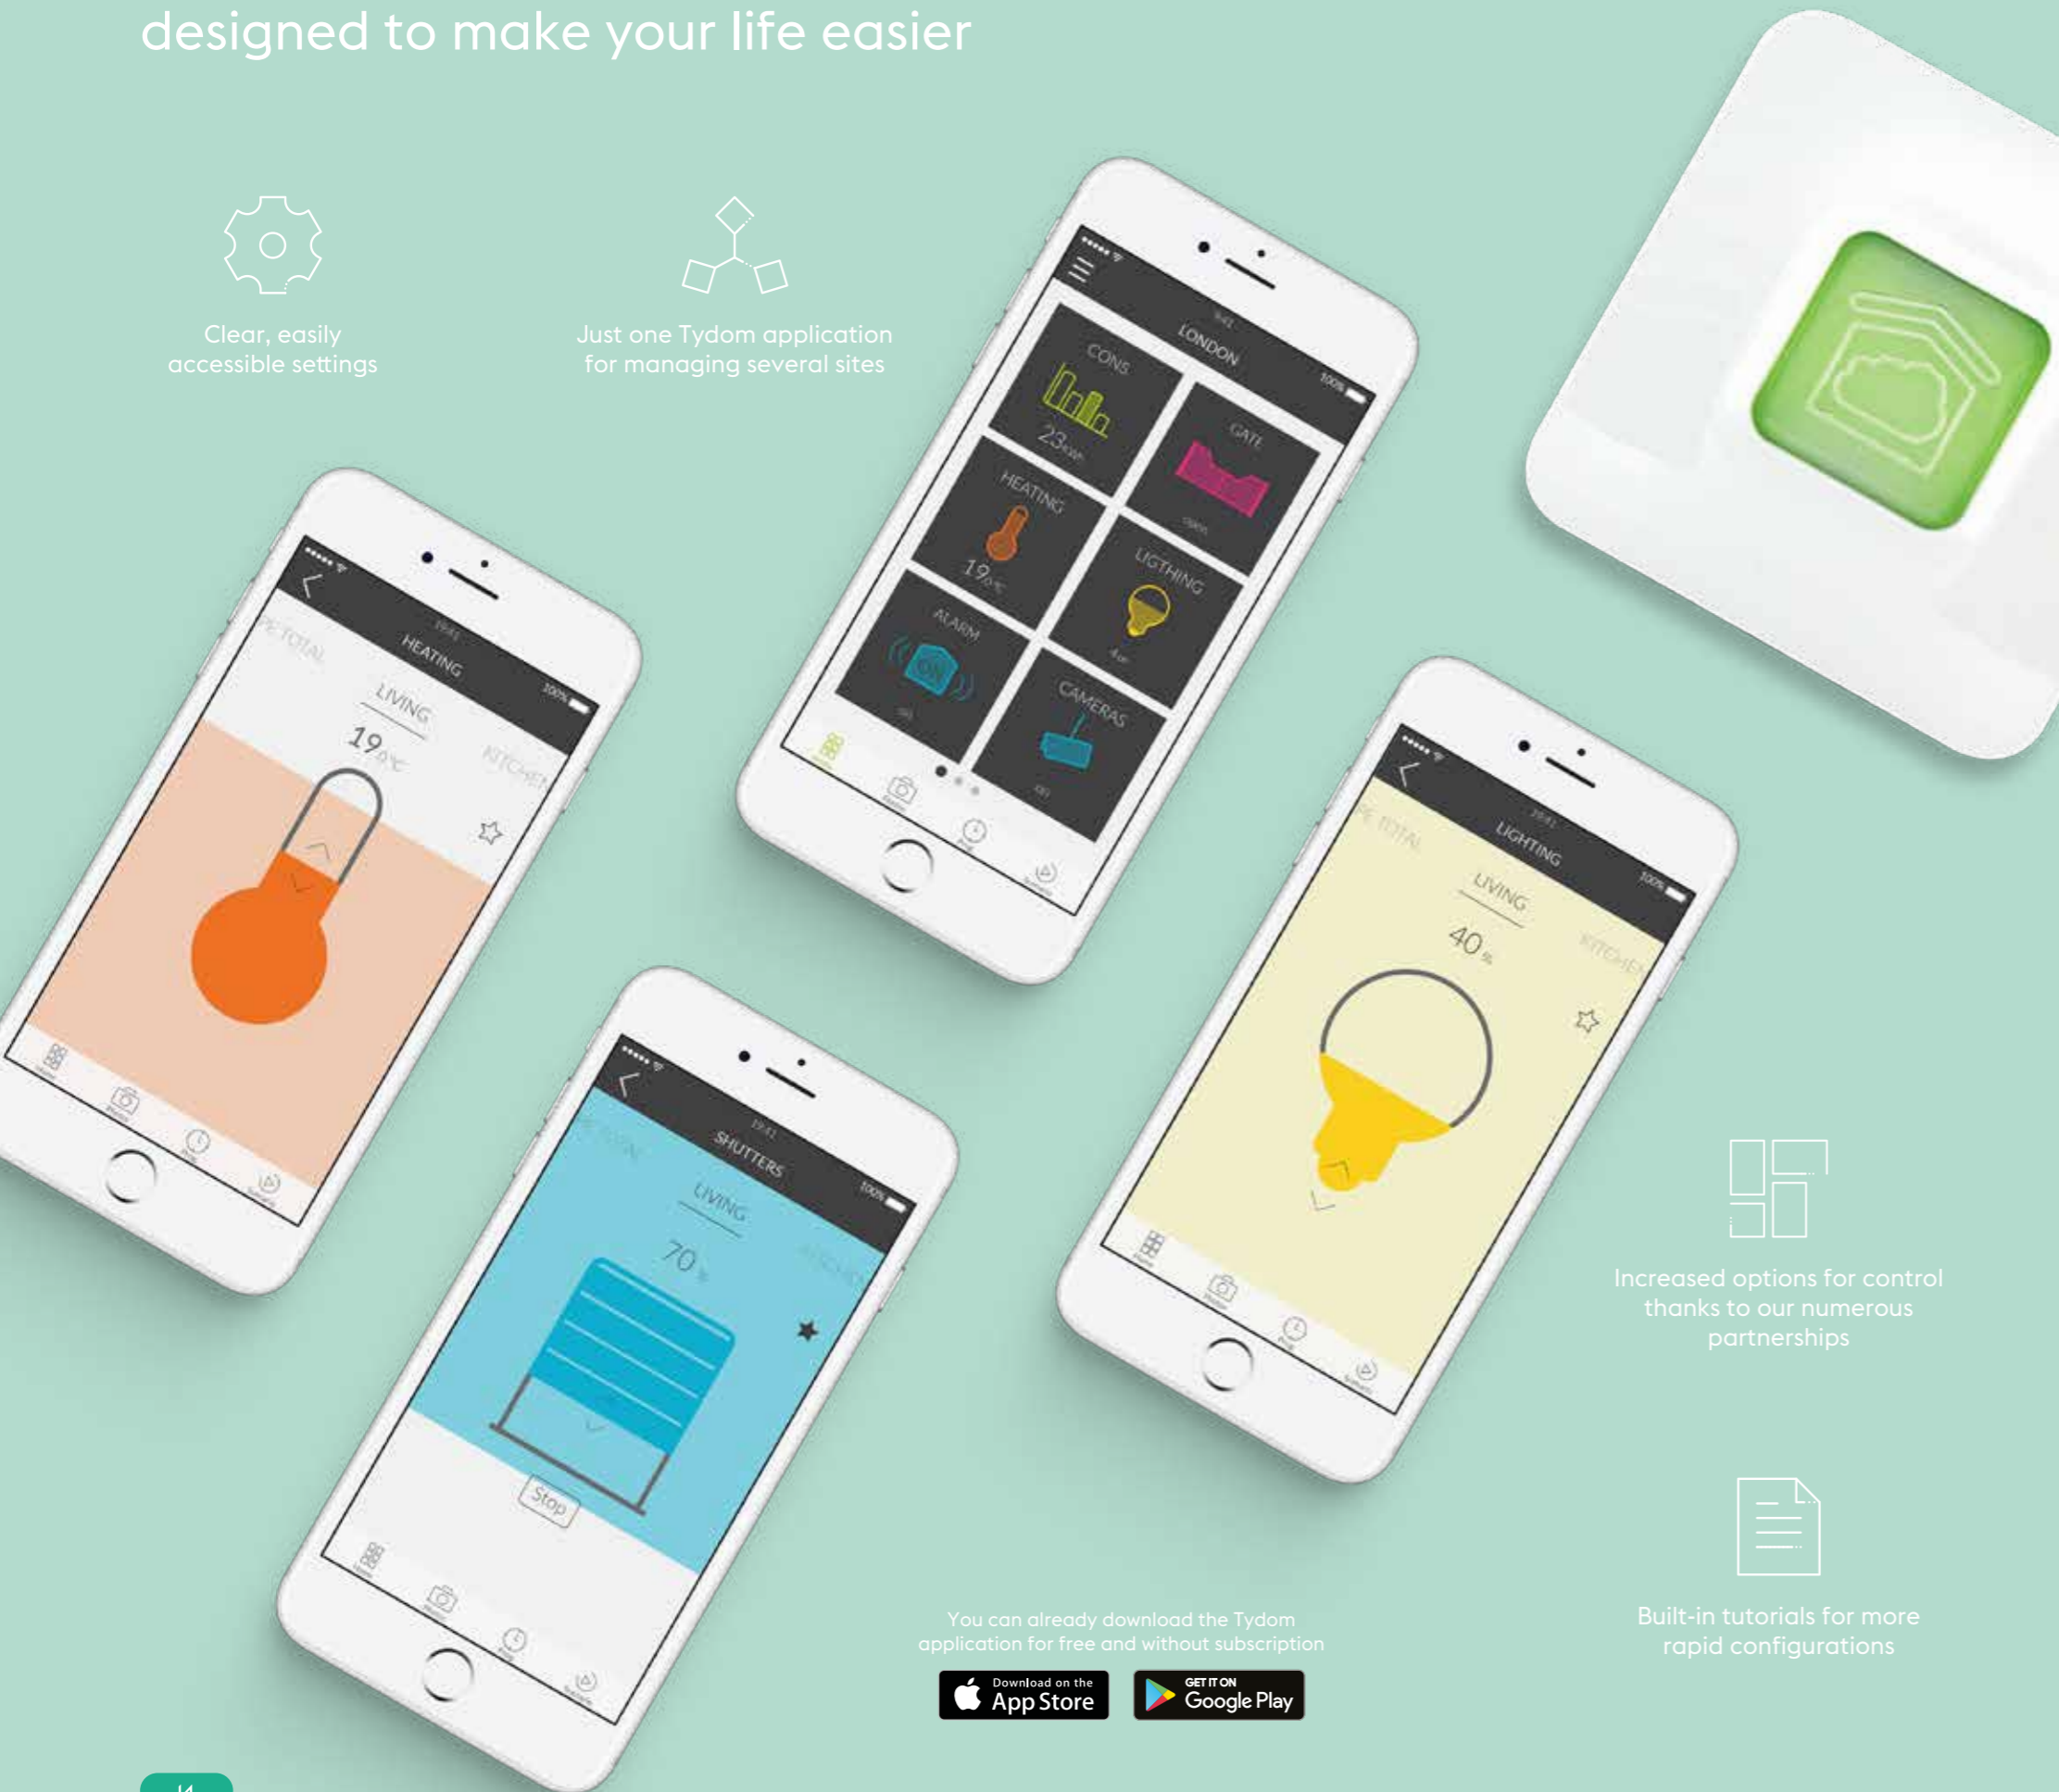

designed to make your life easier

Clear, easily accessible settings

Just one Tydom application for managing several sites

You can already download the Tydom application for free and without subscription

Increased options for control thanks to our numerous partnerships

Built-in tutorials for more rapid configurations

WHAT'S NEW FOR YOUR CLIENTS?

Smoother and faster navigation

-

Simplified settings

-

Secure access with login and password

-

Multi-site

-

Voice assistant compatible

AN ENHANCED HOMEPAGE:

Numerous options for personalisation
(Database of symbols, favourites, tailor your home screen, etc.)

-

Feedback display

-

New navigation bar
with different forms of control
(programming, scenarios, control using photos of rooms in the home)

Smart home hub

Tydom 1.O • Ref. 6700107

- Simple to install: IP channel connects directly to your customers router (compatible with all routers)
- Radio range: up to 300 meters in open field
- Wireless connection with all compatible Delta Dore products
- Free secure application with no fees lets you control your alarm system remotely

Tydom 1.O smart home hub
Activate or deactivate the alarm using a smartphone or tablet
Status report for each zone
Smartphone notifications if intrusion is detected

Tydom application
Available on online stores (more details on pages 18-19)

Compatible with all Delta Dore connected products so each installation can be easily upgraded.

RTS

MyHOME

Top tips!

The Delta Dore ranges are all compatible with each other, which means added value for your customers!

An alarm that can also save gas & electricity!

Fitting out your customers' homes with window detectors will help them to reduce their heating consumption by protecting against forgetfulness. When connected to a thermostat or energy manager, the detector will send a signal when a window is opened and the heating will automatically switch into frost protection mode until the window is closed again.

Find out more on pages 24 and 25.

Tyxal+ DO • Ref. 6412288
Tyxal+ Radio door/window detector

Tybox 5100 • Ref. 6050608
room thermostat

An outdoor keypad can control the alarm – but that's not all!

This keypad allows the user to activate or deactivate the alarm from outdoors, either completely or zone by zone.

But it can also be connected to your customer's gate and/or garage door: using 2 dedicated buttons on the keypad (and a set code), these doors can be opened with ease.

CLE 8000 • Ref. 6413255
outdoor keypad

Tyxia 6410 • Ref. 6351180
receiver for gate

Tyxia 4620 • Ref. 6351104
receiver for garage door

There's more to this pocket-sized receiver than meets the eye!

The Tyxia 4910 is a small modular receiver used for lighting control – but it can do so much more!

- Alarm and surveillance on/off reports with a choice of lighting (indoor/outdoor/flash lighting)
- In the event of an alert, it can send a command to switch on all the lights of the protected building
- When a hard-wired alarm system is upgraded with Tyxal+ wireless products, and when a Tyxia 4910 is added to the electrical switchboard, the system's surveillance on/off function can be performed with a control of your choice from the Tyxal+ range.

Tyxia 4910 • Ref. 6351386
modular receiver

Keyring remote control

This practical and lightweight device can be taken anywhere and does its job well!

It has 2 buttons for controlling the Tyxal+ alarm system, and 2 other buttons for controlling a range of other automation systems (e.g. gate, garage door, outdoor lighting).

One button can also be configured to become an SOS button: when the remote control is configured with a Tyxal+ transmitter, when pressed it will send an alert by dialling pre-set telephone numbers.

TL 2000 • Ref. 6413251
keyring remote control

My Connected Home by Delta Dore

Our concept homes are also designed to receive you, whether you are installers, distributors, architects, constructors or real estate promoters... Come here to receive advice or accompany your clients, so they can have a real life experience of solutions for their project.
